- ✓ **Fat liquified and eliminated as toxins and waste**
- ✓ **Skin tightening**
- ✓ **Visible reduced inches after treatment**

# FAT FREEZING

Super Intense Fat freezing for the stomach is a non-invasive, procedure that gently and effectively removed fat from targeted areas of the body that have not responded to traditional diet and exercise. You can benefit from noticeable yet natural-looking results in their problem areas, providing an overall smoother body contour. It is most effective in removing fat from the tummy and love handles.

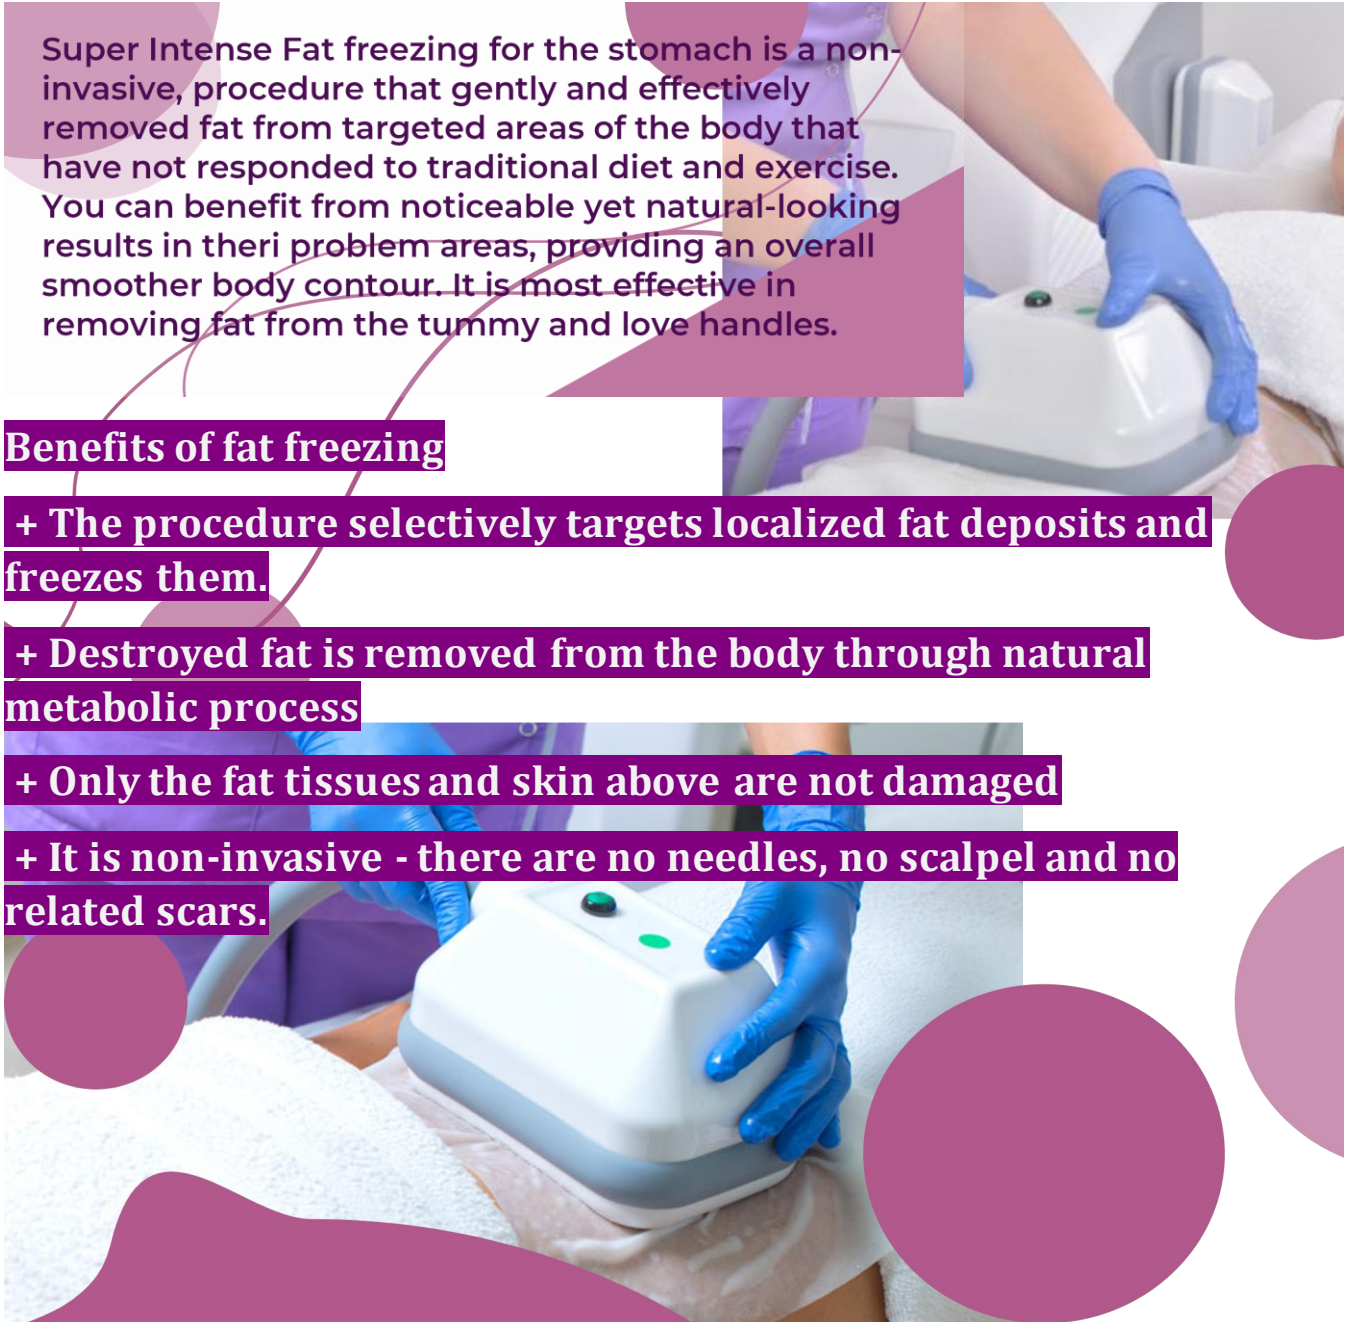

## Benefits of fat freezing

+ The procedure selectively targets localized fat deposits and freezes them.

+ Destroyed fat is removed from the body through natural metabolic process

+ Only the fat tissues and skin above are not damaged

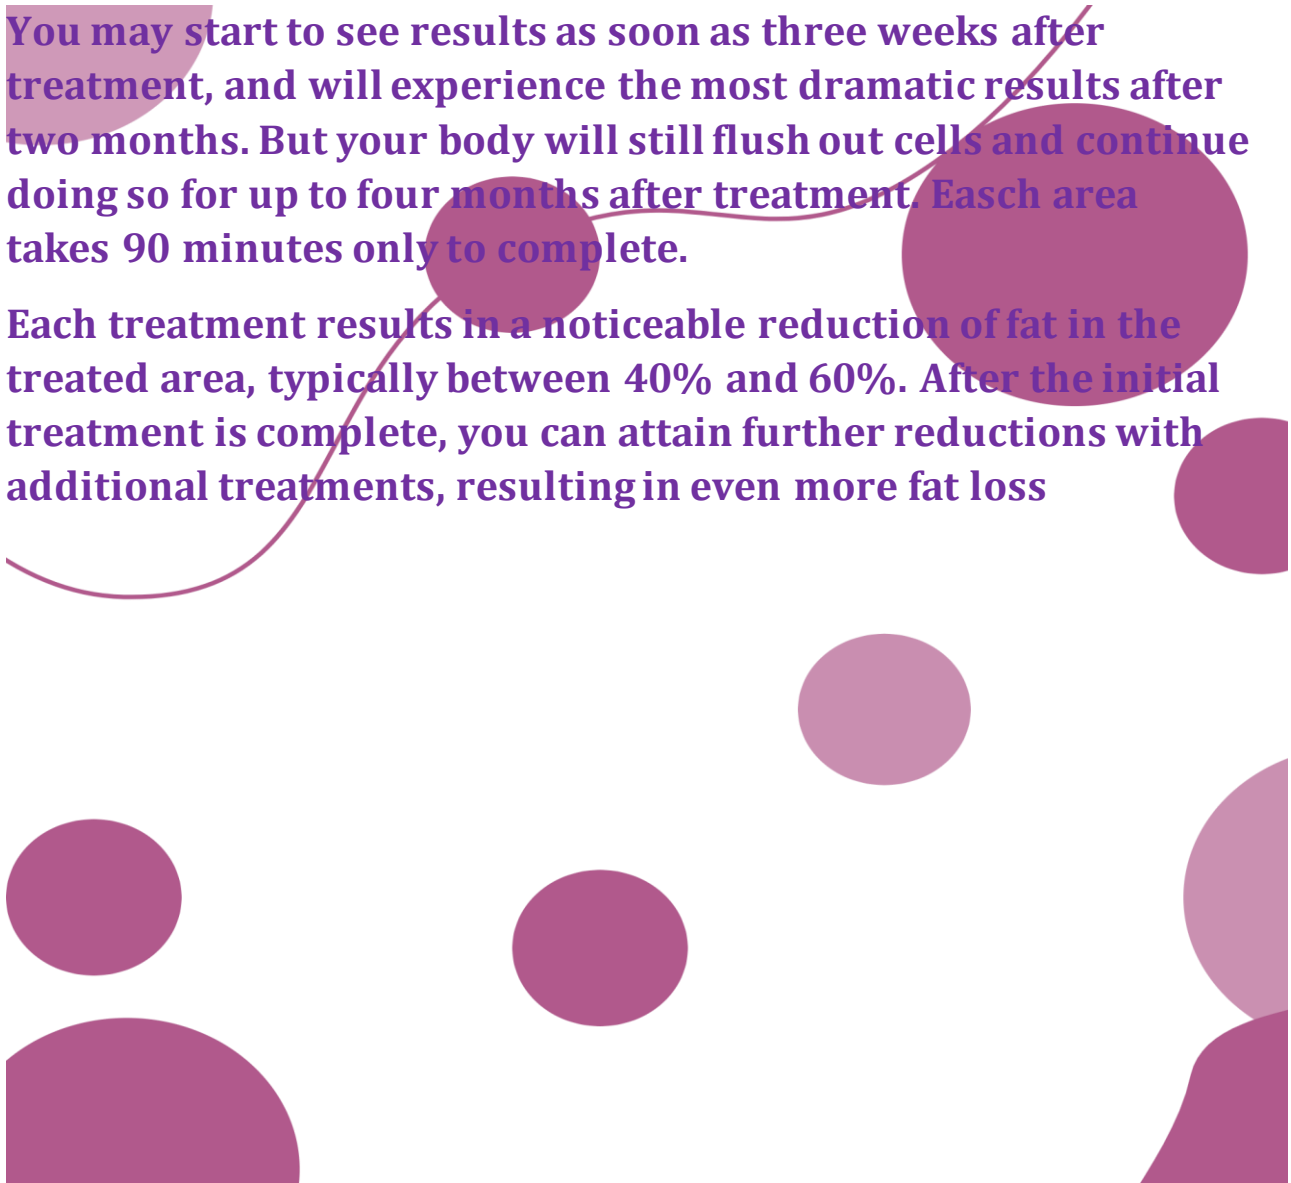

+ It is non-invasive - there are no needles, no scalpel and no related scars.

You may start to see results as soon as three weeks after treatment, and will experience the most dramatic results after two months. But your body will still flush out cells and continue doing so for up to four months after treatment. Each area takes 90 minutes only to complete.

Each treatment results in a noticeable reduction of fat in the treated area, typically between 40% and 60%. After the initial treatment is complete, you can attain further reductions with additional treatments, resulting in even more fat loss

**About us**

**We provide you with quality, safe and affordable weight loss and skin care services. To keep you looking your best!**

## **Our Mission:**

**To provide you with the body shape and skin you deserve!**

## **Our vision:**
